

Peak Health Management hitting a high with Acer wireless technology

"When the client arrives at the medical clinic, access to the wireless Acer Tablet PCs in the waiting room means they can fill in all their details, update records and save time when in consultation with the medical professional."

Lou Pascuzzi, Director, Peak Health Management

Established in 1995, Peak Health Management (Peak) is an industry leader in corporate health services, providing executives access to medical services specific to corporate needs. A young and dynamic company, Peak is innovative and forward thinking in its approach to all its tailored services.

Peak's new Executive Medical Suites are the latest in Peak's commitment to excellence and total service delivery. As part of Peak's mission to always deliver a premium level of service to clients, technology plays a key role in providing a non-threatening and professional medical environment.

Doctors at Peak Medical Suites will be using Acer TravelMate 290 notebooks in consultation rooms, while patients in the waiting room have access to Acer Tablet PCs. Both the TravelMate 290s and Tablet PCs are equipped with Intel Centrino mobile technology, giving doctors and patients wireless internet access.

Peak Director, Lou Pascuzzi, has identified wireless technology as a key differentiator in providing individuals and staff with an enhanced medical experience.

"We are providing individuals and staff with the best possible experience in a medical practice," said Mr. Pascuzzi. "Peak is the only medical service provider in the Southern Hemisphere, possibly in the world, providing this level of wireless technology integration and this is reflected in the clients overall experience."

Wireless for Clients

Opening the first Executive Medical Suite in Melbourne in March 2004, Peak will be opening Sydney and Brisbane mid-year, with suites due to open in Adelaide and Perth later in 2004. Offering clients access to wireless technology in the Medical Suite is part of Peak's commitment to client care.

"We are revolutionising the medical industry. Clients can book their appointments online, browse GPs on duty, select a specific doctor and make an appointment all without ever having to pick up a phone," said Mr. Pascuzzi. "And when the client arrives at the medical clinic, access to the wireless Acer Tablet PCs in the waiting room means they can fill in all their details, update records and save time when in consultation with the medical professional."
